

# The Colour Mixer

## REQUIREMENTS

- ☑ Create a colour-mixing application (using IF Statements) that will inform the user of the colours they can create when mixing different **colours together**
- ☑ Your application should be able to inform the user of the following **colour mixes**:
  - ✓ Red + Blue = Magenta
  - ✓ Red + Red = Red
  - ✓ Red + Black = Dark Red
  - ✓ Blue + Red = Magenta
  - ✓ Blue + Blue = Blue
  - ✓ Blue + Black = Dark Blue
  - ✓ Black + Red = Dark Red
  - ✓ Black + Blue = Dark Blue
  - ✓ Black + Black = Black

```
#####
# Please choose a colour (enter the numeric ID); #
# <1> - Red                                     #
# <2> - Blue                                     #
# <3> - Black                                    #
# #####                                         #
1
#####
# Please choose a second colour;                #
# <1> - Red                                     #
# <2> - Blue                                     #
# <3> - Black                                    #
# #####                                         #
2
#####
* Red + Blue = Magenta *
* You have created Magenta *
#####
#####
Would you like to mix more colours?
<1> - Yes
<2> - No
```
